

Git & GitHub — Free Courses + Certificates

Tour reference handout — git & GitHub credentials you can earn alongside the tour. Most are free and issue a shareable certificate or badge. Earn one, then add it to LinkedIn.

Top pick — GitHub Foundations Certification

Official GitHub credential — a real, verifiable badge covering exactly our workflow: repos, branches, commits, pull requests, collaboration. The exam is normally paid (~US\$99), but students can often get it **free via GitHub Education** (student verification / voucher campaigns — check eligibility on the page).

- Certification + student eligibility:
https://education.github.com/experiences/foundations_certificate
- Free prep: 4-course Git & GitHub skill track on DataCamp (linked from the page above)

Free courses with certificate of completion

Course	Provider	Notes
Learn Git	Codecademy	Hands-on; aligned to GitHub Foundations
Git, GitHub & Version Control	Alison	Free cert at 80%+ assessment score
GitHub Tutorial for Beginners	Great Learning	Repos, branch, merge, PR + cert
Git & GitHub Course	ScholarHat	Cert after final assessment; LinkedIn-shareable
Learn Git Basics (SkillUp)	Simplilearn	Beginner-friendly, free cert

-

LinkedIn Learning — git/GitHub paths (Premium)

Structured git / GitHub courses with completion certificates that post straight to your LinkedIn profile. **Requires LinkedIn Premium** — but there's a **1-month free trial**, enough to finish a path and claim the cert (cancel before billing).

- Browse: <https://www.linkedin.com/learning/browse/certifications>
-

Recommended path for tour students

1. **Start free** — a free course with a completion cert (Codecademy / Alison / Great Learning).
2. **Go official** — **GitHub Foundations** if you can get the student-free exam (best credential).
3. **If you want more** — LinkedIn Learning git path on the free trial.
4. Add every badge to your LinkedIn profile.
