

Claude MCP Certificate — Model Context Protocol (Anthropic)

Tour reference handout — ties directly to **Chapter 4 (MCP)**. Free, official Anthropic credential. Earn it, then add the badge to LinkedIn.

Introduction to Model Context Protocol

Same **Anthropic Skilljar** platform as your **Claude 101 / Claude Code 101 / Agent Skills / Subagents** certs — so this badge sits right next to those on your profile.

- **Course:** *Introduction to Model Context Protocol* — **free to register**
 - **Link:** <https://anthropic.skilljar.com/introduction-to-model-context-protocol>
 - **Covers:** MCP architecture, the 3 core primitives (tools, resources, prompts), building MCP servers + clients with the Python SDK, and integrating with Claude.
 - **Best for:** anyone who liked Chapter 4 (MCP) — turns the class work into a real credential.
 - Completion → Skilljar certificate (verify.skilljar.com), shareable on LinkedIn.
-

Why earn it

- **Most relevant cert to the tour** — MCP is what powers Context7, claude-mem, and the context-expansion tools you used in Chapter 4.
 - **Stacks with your existing Claude certs** — same platform, same verify domain.
 - **Free + fast** — register, watch, pass the quiz, claim the badge.
-

Recommended

1. Finish **Chapter 4** so the concepts are fresh.
2. Take *Introduction to Model Context Protocol* (free).
3. Add the badge to LinkedIn alongside your Claude Code certs.

This one is free for everyone — no student verification needed.

Git & GitHub certificates: see [git-certifications.md](#) .
